DETAILED ACTION

Remarks

This Office Action is responsive to Applicant's amendment filed October 24, 2002.

The objection to claim 2 for informalities has been withdrawn.

The rejection of claims 2, 4 and 5 under 35 U.S.C. 112, second paragraph has been withdrawn.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 2, 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ise et al. in view of Rendina.

The above rejection has been discussed in detail in the previous Office Action. The examiner notes that applicant's amendment to the present claims appear to have been submitted only to obviate a claim objection for a minor informality and the ground of rejection under 35 U.S.C. 112, second paragraph. The scope of the present claims are substantially similar if not identical to those considered in the previous Office Action. Thus, the prior art rejections are maintained for the reasons of record.

Applicant's arguments filed with the present amendment have been fully considered, however they are not persuasive.

Art Unit: 1745

Applicant submits that in Ise not showing a third step of heat-treating by sintering, as a result thereof the "effect that an oxide on the surface of each of the particles of the hydrogen absorbing alloy is reduced by sintering, Mn contained in the hydrogen absorbing alloy is moved to the surface of the particle of the hydrogen absorbing alloy, and Ni and Co are prevented from being oxidized again by Mn as shown in the present invention". This is not persuasive, as one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references, in this case Ise et al. in view of Rendina. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). The teachings of Rendina were relied upon to show a sintering step, and while Applicant similarly argues that Rendina does not show any of the alleged beneficial effects of surface oxide reduction, Mn outer surface migration or minimization of Ni and Co oxidation, the examiner notes that these effects, allegedly part of or resulting from the claimed invention, are outside the scope of the present claims.

Conclusion

The prior art relied upon in this Office Action will not be provided, since it is the same prior art presently of record.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1745

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
